

WHAT IS A PREVENTION SCREENING?

The SMASH Prevention Screening is a brief, 15-minute interview conducted with a peer support specialist to review your alcohol and/or drug use and identify any behaviors that may increase your risk for substance abuse or mental health problems. Identifying and understanding your risk can help you make healthier decisions and reduce the negative impact of alcohol/drugs (e.g. hangovers, withdrawal, dependence). Even if you don't drink or use drugs, the other benefits of completing your risk profile include:

- Peer Support
- Linkage to Care
- Gift Cards, Free Condoms & SWAG

Substance Misuse Awareness & Sexual Health

WHAT IS SMASH?

Substance Misuse Awareness & Sexual Health

S.M.A.S.H., or Substance Misuse Awareness & Sexual Health, is a program designed to offer a judgment-free, safe environment to discuss your health needs and questions. We offer prevention services to men 18 years of age or older for substance abuse, HIV/AIDS and hepatitis.

We understand each of your needs are unique, so a variety of services will be available to you. Our services include, but are not limited to:

- Smash Prevention Screening
- Peer Support
- Case Management
- PrEP (HIV Prevention Pill)
- Referral to Treatment
- Condom Distribution
- HIV/Hepatitis Testing

WITH S.M.A.S.H. YOU WILL:

- 👉 Learn more about alcohol myths and facts
- 👉 Ask questions and receive honest answers about HIV/HCV
- 👉 Identify and discuss how to overcome challenges
- 👉 Create a future plan to meet your life goals
- 👉 Have conversations about your personal experiences
- 👉 Focus on creating new habits and routines to enhance health and well-being.

"The SMASH Prevention Screening was a super easy and cool screening to take. I not only realized how much my intake for drinking was but I also learned more info about substance misuse."

- SMASH TESTIMONIAL

WHAT IS PrEP?

PrEP, or pre-exposure prophylaxis, is a daily pill that can prevent HIV. If you are sexually active, ask your health care provider if PrEP is right for you.

PrEP can help people stay HIV-negative. Talk to your doctor about PrEP today.

HIV

Did you know that HIV can be passed through sexual contact and sharing needles? Human Immunodeficiency Virus (HIV) is a virus that can lead to acquired Immunodeficiency Syndrome (AIDS) if not treated.

HCV

Hepatitis C is a liver infection caused by the hepatitis C virus (HCV). HCV is spread by sharing needles, injecting drugs and having unprotected sex.

people don't know they have HIV.

of people living with HIV/AIDS are men.

SUBSTANCE ABUSE

Substance abuse is the misuse of alcohol, tobacco, illegal drugs and prescription drugs. This can change a person's thinking and judgement and lead to health risks like addiction, drunk driving and infectious diseases (i.e. HIV/HCV)

Early treatment can prevent long-term health problems, even death.
